

ABDRAHMAN TAIWO OLAJIDE

Network Engineer • Electrical Engineer • CAD Designer

Ikeja, Lagos, Nigeria | +234 815 401 2846 | olajideabdrahman@gmail.com | LinkedIn: Abdrahman Olajide

PROFESSIONAL SUMMARY

Skilled Network Engineer, Electrical Engineer, and CAD Designer with a strong background and certifications in embedded systems programming, network infrastructure design, and CAD modelling. Proven ability to manage enterprise networking environments, design custom embedded systems, and deliver innovative technical solutions. A collaborative team player with hands-on experience in both corporate and field environments.

EDUCATION

BSc Electrical & Electronics Engineering — University of Lagos

CGPA: 4.0 / 5.0 | October 2021 – Present

ND Electrical & Electronics Engineering — Yaba Technical College

CGPA: 3.7 / 4.0 | April 2019 – August 2022

WORK EXPERIENCE

Network Engineering Intern | **UBA Group** November 2025 – January 2026

Tools: Cisco CLI, SolarWinds, Putty SSH, Enterprise Networking

- Gained foundational experience in enterprise networking and Cisco device configuration in a large-scale banking environment.
- Assisted in diagnosing and resolving internal network issues including slow links and downtime incidents.
- Monitored network stability across remote bank branches within the enterprise network infrastructure.

Network Technician | **RS Colman** November 2024 – Present

Tools: Mikrotik, Router OS, Winbox, Cisco CLI

- Managed and maintained the company's Local Area Network (LAN), ensuring reliable connectivity and optimal performance.
- Configured and deployed Site-to-Site VPN for remote monitoring of installed field devices.
- Installed a NAS server for seamless file sharing among employees, improving project management efficiency.

Electrical & Software Engineering Intern | **Basic Works** January 2022 – November 2024

Tools: Arduino IDE, Python, KiCad, VS Code, HTML, JavaScript, C#, C++, PlatformIO

- Utilized KiCad, Copper-CAM, and Linux-CNC for PCB design, prototyping, and manufacturing of custom electronic circuits.
- Installed, configured, and managed electrical power systems including inverters, LED display systems, and street lighting solutions.
- Designed and implemented custom embedded systems for clients using Raspberry Pi, Arduino, and ESP32 platforms.

TECHNICAL SKILLS

Core Competencies: Cisco Router/Switch Configuration, Remote Networking, LAN Management, IoT Solutions, Electrical Circuit Design

Network Frameworks: Cisco CLI, Router OS

Programming Languages: HTML, Python, C/C++, JavaScript

Tools & Software: Packet Tracer, Winbox, Putty SSH, KiCAD, SolarWinds, SolidWorks, LTSpice, PlatformIO

CERTIFICATIONS

- CCNA: Introduction to Networks--Cisco
- CCNA: Switching, Routing, and Wireless Essentials--Cisco.
- Network Technician Career Path--Cisco
- Certified SOLIDWORKS Associate--SolidWorks
- Embedded Software Development with C--EDUCBA
- Energy production Distribution and safety--University at Buffalo
- Google IT support--Google
